

# Gloves in a bottle protect hands from chemicals

Already well established in America, a new hand protection shielding lotion that bonds with the outer layer of skin is now available in the UK.

Gloves in a Bottle from **Abbliss** is a non greasy, non-sticky, hypoallergenic and completely safe hand protection shielding lotion that acts as a skin safeguard for many applications including cleaning, DIY, hospital duties, maintenance and groundwork.

Many workplace and household chemicals are absorbed directly into the skin, causing dry, itchy and cracked skin. Conventional lotions just replace natural oils with artificial ones, offering only

temporary relief that does not heal the skin.

One application of Gloves in a Bottle does not wash off and works like an invisible pair of gloves – preventing dirt and grime from penetrating the skin.

Gloves in a Bottle rapidly absorbs and bonds with the outer layer of skin providing a protective glove like coating that comes off naturally with exfoliated skin cells after at least 4 hours. It is a handy moisturiser for dry, extremely dry and cracked skin by allowing skin to breath and retain its natural moisture and oils.

According to the company, Gloves in a Bottle is recommended by hundreds of dermatologists in America for skincare. It is suitable for use wherever gloves would usually be worn.

Gloves in a Bottle 2006/7

Are your hands always dry or worse covered in eczema, scaly and cracked? Have you tried conventional handcreams and found they haven't solved the problem? You need Gloves in a Bottle – a pea sized drop every four hours will protect your hands from moisture-robbing irritants while helping to maintain moisture levels. Gloves in a Bottle is easily absorbed, non-sticky and does not wash off but comes off naturally with exfoliated skin cells. Lanolin and fragrance free. 8 fl oz.

- 8 fl oz bottle M/3704 - £10.99
- 2 fl oz pocket/trial size M/4370 - £4.99

*"This lotion has transformed my hands and my life. For years I suffered with very bad eczema on the palms of my hands. It was very painful and often infected. I bought some Gloves in a Bottle just to see if it worked. Having tried almost every lotion and potion under the sun, I admit I was cynical but it really does work. Although I still get the odd itch, my hands are clear of eczema for the first time in 32 years!" - Mrs JE, NHS Manager, Oxon.*

## Abbliss

Already established in the US, Abbliss' Gloves in a Bottle is now available in the UK. The shielding lotion is designed to bond with the outer layers of the skin to offer protection that is non-greasy, non-sticky, hypoallergenic, won't wash off when you wash your hands and is removed by natural exfoliation over about four hours.

For applications such as gardening, housework and DIY, Gloves in a Bottle helps keeps irritants out while retaining the skin's natural oils and moisture.

## Gloves in a Bottle

Already well established in many hospitals in America, a new hand protection that bonds with the outer layers of the skin is now available in the UK. New 'Gloves in a Bottle' is a non-greasy, non-sticky, hypoallergenic and completely safe hand protection that is an ideal skin safeguard for all medical, nursing and hospital duties. Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. One application of Gloves in a Bottle does not wash off and lasts for at least 4 hours preventing dirt and grime from penetrating the skin. Gloves in a Bottle creates a protective shield while retaining natural moisture from within. Tel: 0800 389 4710.

## Product Briefing

ALREADY well-established in America, a new hand protection shielding lotion that bonds with the outer layers of the skin is now available in the UK.

New **Gloves in a Bottle**, available in the UK from Abbliss, is a non-greasy, non-sticky, hypoallergenic hand protection shielding lotion that is said to be an ideal skin safeguard for applications that include all work in harsh weather conditions, household work, DIY, hospital duties, sport, gardening, construction and engineering work.

One application of Gloves in a Bottle does not wash off, says Abbliss, and works like an invisible pair of gloves, preventing dirt and grime from penetrating the skin. The coating comes off naturally with exfoliated skin cells after at least four hours.
