Abbliss lotion protects like a glove

Gloves in a Bottle from Abbliss is a hand protection shielding lotion, which bonds to the outer layers of the skin.

The product is non-sticky, non-greasy, hypoallergenic and completely safe, say the company. It forms an ideal safeguard against harsh weather conditions, construction and engineering work, among other applications.

Gloves in a Bottle acts like an invisible pair of gloves, preventing dirt and grime from penetrating the skin and keeping irritants out.

It will not wash off, but instead comes off naturally with exfoliated skin cells after at least four hours. And it is particularly suited to those who suffer from eczema or dry, cracked skin and who need to work with their hands on a regular basis, such as builders.
