

## Gloves in a bottle

Already well established in many hospitals in America, a new hand protection that bonds with the outer layers of the skin is now available in the UK. New 'Gloves in a Bottle' is a non-greasy, non-sticky, hypoallergenic and completely safe hand protection that is an ideal skin safeguard for all medical, nursing and hospital duties.

Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. One application of Gloves in a Bottle does not wash off and last for at least 4 hours, preventing dirt and grime from penetrating the skin. Gloves in a Bottle creates a protective shield while retaining the natural moisture from within. Call 0800 389 4719 for more details.

## Gloves in a Bottle

New 'Gloves in a Bottle' is a non greasy, non-sticky, hypoallergenic and safe hand protection that is an ideal skin safeguard for all medical, nursing and hospital duties. Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. On average, nurses have to wash their

hands up to 20 times an hour. One application of Gloves in a Bottle does not wash off and lasts for at least 4 hours, preventing dirt and grime from penetrating the skin. These 'invisible gloves' keep moisture-robbing irritants out while helping to retain your skin's natural oils and they come off naturally with exfoliated skin.

### Gloves in a bottle

As gardeners we generally don't treat our hands very well. Yes, most of us own gloves, but sometimes you just need to get your hands in the soil to really feel what you are doing. Here's where this product comes in. It's a bit like a barrier cream in that it protects hands from drying out during and after gardening. But unlike traditional barrier creams, it lasts for four hours and won't wear off. It comes off naturally with exfoliated skin cells.

- **Price:** From £4.99 for 60ml.

## Hand shielding lotion launched

A "shielding lotion" for the hands which is said to be already established in America has been launched into UK pharmacies. Gloves in a Bottle is described as a lotion that bonds with the outer layers of the skin. The product is said to offer a non-greasy, non-sticky, hypoallergenic skin "safeguard" that does not wash off and that lasts for at least four hours. The product is said to be a moisturiser for "dry, very dry and cracked skin" which lets it breathe and retain its natural moisture and oils while providing a protective layer. Gloves in a Bottle is available in pocket or handbag sizes or 240ml economical bottles. More information can be found at [www.giab.co.uk](http://www.giab.co.uk).
