New Invisible Hand Protection Fits

Already well established in many hospitals in America, a new hand protection from **Abbliss** that bonds with the outer layers of the skin, is now available in the UK. New 'Gloves in a Bottle' is a non greasy, non-sticky, hypoallergenic and completely safe hand protection that is an ideal skin safeguard for all medical, nursing and hospital duties. Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. On average, nurses have to wash their hands every two and a half minutes. One application of Gloves in a Bottle does not wash off and lasts for at least 4 hours preventing dirt and grime from penetrating the skin. These 'Invisible Gloves' keep moisture-robbing irritants out while helping to retain your skin's natural oils and they come off naturally with exfoliated skin cells. Gloves in a Bottle rapidly absorbs into and bonds with the outer layer of skin providing a protective 'shielding lotion'. It acts as an ideal moisturiser for dry, extremely dry and cracked skin by allowing skin to breath and retain its natural moisture and oils. When you know you should be protecting your skin - until now all one could do to alleviate skin disorders or just plain dry cracked skin was to apply conventional lotions, artificial moisture replacement systems. Gloves in a Bottle creates a protective shield while retaining the natural moisture from within. Gloves in a Bottle is available in a handy 60ml. pocket or handbag size, 240ml economical bottle or large sized container for wall-mounted dispensing units.

PRODUCT NEWS

New invisible hand protection fits all medical applications like a glove

Already well established in many hospitals in America, a new hand protection that bonds with the outer layers of the skin, is now available in the UK.

New 'Gloves in a Bottle' is a non greasy, non-sticky, hypoallergenic and completely safe hand protection that is an ideal skin safeguard for all medical, nursing and hospital duties.

Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. On average, nurses have to wash their hands up to twenty times an hour. One application of Gloves in a Bottle does not wash off and lasts for at least 4 hours preventing dirt and grime from penetrating the skin.

These 'Invisible Gloves' keep moisture-robbing irritants out while helping to retain your skin's natural oils and they come off naturally with exfoliated skin cells.

Gloves in a Bottle rapidly absorbs into and bonds with the outer layer of skin providing a protective 'shielding lotion'. It acts as an ideal moisturiser for dry, extremely dry and cracked skin by allowing skin to breath and retain its natural moisture and oils.

When you know you should be protecting your skin - until now all one could do to alleviate skin disorders or just plain dry cracked skin was to apply conventional lotions, artificial moisture replacement systems. Gloves in a Bottle creates a protective shield while retaining the natural moisture from within.

Gloves in a Bottle comes in a handy 60ml. pocket or handbag size,

240ml economical bottle or large sized container for wall-mounted dispensing units. Counter-top point-of-sale cartons - containing 24 x 60ml. bottles - for sales in reception and office areas are available.
