

Already well established in America, a new hand protection shielding lotion that bonds with the outer layers of the skin, is now available in the UK.

New GLOVES IN A BOTTLE is a non greasy, non-sticky, hypoallergenic and completely safe hand protection shielding lotion that is an ideal skin safeguard for applications that include hospital duties.

Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. One application of GLOVES IN A BOTTLE does not wash off and works like an invisible pair of gloves preventing dirt and grime from penetrating the skin. These 'invisible gloves' keep moisture-robbing irritants out while retaining your skins natural oils.

Invisible

hand protection

GLOVES IN A BOTTLE rapidly absorbs into and bonds with the outer layer of skin providing a protective glove-like coating, that comes off naturally with exfoliated skin cells after at least four hours. It is an ideal moisturiser for dry, extremely dry and cracked skin by allowing skin to breath and retain its natural moisture and oils.

Many workplace and household chemicals are absorbed directly into the skin, causing dry, itchy, and cracked skin. Conventional lotions

just replace natural oils with artificial ones, offering only temporary relief that does not heal the skin.

Never before have so many common skin conditions, allergies and complaints been afforded the protection offered by GLOVES IN A BOTTLE.

Hundreds of dermatologists in America recommend it for skin care, as a dry skin moisturiser, for prevention of dry, itchy skin problems of all kinds and to help moisturise skin from the inside out.

A shielding lotion, GLOVES IN A BOTTLE creates a protective shielding layer while retaining the moisture from within.

Sounds crazy but it's true. New Gloves in a Bottle is a hand lotion that bonds with the skin of your hand. The shielding lotion works to prevent dirt and grime from penetrating the skin and keeps moisture-robbing irritants out whilst retaining your skin's natural oils.

Working like an invisible pair of gloves, the lotion is not greasy and does not wash off (no doubt a good point for us sailors)! We're not saying that a helping of this lotion will stop rope rubs or blisters but it does act like a shield and moisturises dry, cracked skin. The lotion allows the skin to breath and retain its natural moisture at the same time! Then after sailing it can be used to soothe.

If you're having a tough time getting your head round the concept, just like we did for a while, visit the Win Stuff pages at www.dinghysailingmagazine.co.uk for your chance to win a sample, or just put your hand in your pocket and order a bottle anyway. For a fiver, anything that can help keep your hands soft is worth it we say!
