

Skin protection that fits like a glove

A HAND protection lotion that bonds to the skin is being launched for anglers and shooters to combat harsh weather.

Called Gloves In A Bottle, the lotion is non-greasy, non-sticky and hypoallergenic, as well as being designed to lock in natural moisture and repel dirt and grime.

It is said to easily absorb into the skin and provide a protective barrier to ward off moisture-robbing irritants while retaining your skin's natural oils - just like a pair of gloves.

If you know you should be wearing gloves, either when fishing or out in bad weather, then Gloves In A Bottle is said to be extremely effective.

It's already won friends in the USA and is now available in the UK via distributor Abbliss Ltd at a retail price of £4.99.

Invisible gloves

Gloves in a Bottle is a non-greasy, non-sticky, hypoallergenic hand protection shielding lotion.

Manufacturer Abbliss says it is a skin safeguard suitable for applications including work in harsh weather conditions, construction and engineering.

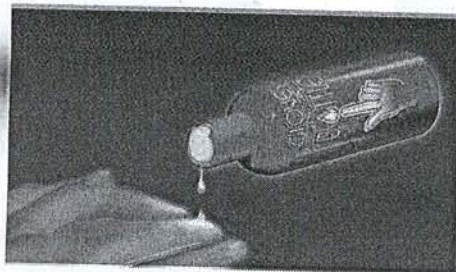

Artificial lotions attempt to replace natural oils with artificial moisture, but they come off when washed. One application of Gloves in a Bottle does not wash off and works like an invisible pair of gloves preventing dirt and grime from penetrating the skin.

Gloves in a Bottle absorbs into and bonds with the outer layer of skin providing a protective glove-like coating. It comes off naturally with exfoliated skin cells after at least four hours.

HAND PROTECTION

117

Invisible touch

Many workplace and household chemicals are absorbed directly into the skin, causing dry, itchy, and cracked skin. A new hand-protection lotion, which is said to have been successful in the US, has been launched in the UK and hopes to change that. According to the makers, **Gloves In A Bottle** is a non-greasy, non-sticky, hypoallergenic and completely safe hand-protection shielding lotion that bonds with the outer layers of the skin.

Gloves In A Bottle does not wash off, and is said to work like an invisible pair of gloves, preventing dirt and grime from penetrating the skin. This keeps moisture-robbing irritants out, while retaining the skin's natural oils, says the company, which also describes the lotion as an ideal moisturiser for dry, extremely dry, and cracked skin, because it allows skin to breathe and retain its natural moisture and oils.

Conventional lotions just replace natural oils with artificial ones, offering only temporary relief that does not heal the skin, the company adds. Never before, it maintains, have so many common skin conditions, allergies and complaints been afforded the solution offered by Gloves In A Bottle, which starts working with just one application.
