

# Liquid gloves give gardeners a helping hand

HELP'S at hand if you don't like wearing gloves while you're gardening. Gloves in a Bottle – already a hit in the US – is a hand-protection lotion that bonds with the outer layers of your skin.

The makers say it's an ideal skin safeguard for gardening because it works with the body's own defences.

One application should last for at least four hours and won't wash off, preventing moisture and grime from penetrating

your skin but at the same allowing it to breathe and retain its natural moisture and oils.

Prices start at £4.99 for a 60ml bottle. It's available from shops or online from [www.giab.co.uk](http://www.giab.co.uk)

Gloves in a Bottle creates an invisible shield

## Gloves in a bottle protect hands from chemicals

Already well established in America, a new hand protection shielding lotion that bonds with the outer layer of skin is now available in the UK.

Gloves in a Bottle from **Abbliss** is a non greasy, non-sticky, hypoallergenic and completely safe hand protection shielding lotion that acts as a skin safeguard for many applications including cleaning, DIY, hospital duties, maintenance and groundwork.

Many workplace and household chemicals are absorbed directly into the skin, causing dry, itchy and cracked skin. Conventional lotions just replace natural oils with artificial ones, offering only

temporary relief that does not heal the skin.

One application of Gloves in a Bottle does not wash off and works like an invisible pair of

gloves – preventing dirt and grime from penetrating the skin.

Gloves in a Bottle rapidly absorbs and bonds with the outer layer of skin providing a protective glove like coating that comes off naturally with

exfoliated skin cells after at least 4 hours. It is a handy moisturiser for dry, extremely dry and cracked skin by allowing skin to breath and retain its natural moisture and oils.

According to the company, Gloves in a Bottle is recommended by hundreds of dermatologists in America for skincare. It is suitable for use wherever gloves would usually be worn.

### New invisible hand protection fits all medical appliances like a glove

A new hand protection that bonds with the outer layers of the skin, is now available in the UK. New

'Gloves in a Bottle' is a non greasy, non-sticky, hypoallergenic and completely safe hand protection that is an ideal skin safeguard for all medical, nursing and hospital duties.

Artificial lotions only attempt to replace natural oils with artificial moisture, but they come off every time you wash. On average, nurses have to wash their hands up to twenty times an hour. One application of Gloves in a Bottle does not wash off and lasts for at least 4 hours preventing dirt and grime from penetrating the skin. These 'Invisible Gloves' keep moisture-robbing irritants out while helping to retain your skin's natural oils and they come off naturally with exfoliated skin cells.

Gloves in a Bottle rapidly absorbs into and bonds with the outer layer of skin providing a protective 'shielding lotion'.
