

Gloves In A Botte

is a dry skin, eczema and dermatitis hand protection shielding lotion that is an ideal skin safeguard. One application does not wash off and works like an invisible pair of gloves to prevent dirt and grime from penetrating the skin and causing skin

conditions to flare up. The formula rapidly absorbs into and bonds with the outer layer of skin, providing a natural glove-like coating that comes off naturally with exfoliated skin cells after at least four hours. It is an ideal moisturiser for dry and cracked skin as it allows the skin to breathe and retain its natural moisture and oils. For more information visit www.giab.co.uk.

Rsp from £5.10, Abbliss, 0800 389 4710.

Shielding Lotions

Shielding lotions bind with dead skin cells on the outer layers of the epidermis to form a protective layer, keeping skin irritants such as chemicals out, and the skin's own natural oils and moisture in. Shielding lotions such as Gloves In A Botte turn the outer layer of skin into 'a pair of invisible gloves' to improve dry skin conditions, such as eczema and dermatitis, and protect against dirt, grime and irritation.
