

Shielding lotion

'Gloves in a Bottle' is a non-greasy, non-sticky, hypoallergenic shielding lotion, which the manufacturer says is an ideal skin safeguard not just for medical, nursing and hospital duties, but for use in any situation when using products which can irritate the skin and cause or exacerbate dry skin complaints.

One application of the lotion lasts for at least four hours preventing dirt and grime from penetrating the skin, acting as 'invisible gloves' that keep moisture-robbing irritants out while helping to retain your skin's natural oils, says the company.
