Working hard? You need invisible gloves

hands properly. And now there's a product that fits your requirements like a glove.

It's called '**Gloves in a Bottle**' - a new hand protection shielding lotion that bonds with the outer layers of the

If you work in harsh weather conditions, in a hospital or a garden, or you're involved in construction, engineering or household work, you'll know how important it is to protect your

skin. It's already well established in America and is now available in the UK.

'**Gloves in a Bottle**' is non greasy, non-sticky, hypoallergenic and does not wash off. It works

like an invisible pair of gloves, preventing dirt and grime from penetrating the skin, and keeping out moisture-robbing irritants.

The lotion rapidly absorbs into and bonds with the outer layer of skin providing a protective glove-like coating, that comes off naturally with exfoliated skin cells after about four hours.

Your outer layer of

skin is made up of dead skin cells, natural oils and lipids (fats). It's designed by nature to protect the deeper layers of skin from irritants and toxins. And if you have dry, itchy or cracked skin this is nature's way of letting you know this protective barrier has been stripped away. '**Gloves in a Bottle**' is an ideal moisturiser, because it

allows skin to breathe while retaining its natural moisture and oils.

And the really good news is - it's available locally. Get your hands on a bottle at Old Barn Nurseries, Worthing Road, Dial Post from just £4.99 for 60ml. Call 01403 710000.

SCOTTISH PRIMARY CARE

New invisible hand protection

Already well-established in America, a new hand protection shielding lotion that bonds with the outer layers of the skin is now available in the UK.

'**Gloves in a Bottle**' is a non-greasy, non-sticky, hypoallergenic and completely safe hand protection shielding lotion that is an ideal skin safeguard for a wide variety of applications.

Lotions attempt to replace natural oils with artificial moisture, but they come off every time you wash. One application of **Gloves in a Bottle** works like an invisible pair of gloves, preventing dirt and grime from penetrating the skin. These invisible gloves keep moisture-robbing irritants out while retaining your skin's natural oils.

Gloves in a Bottle rapidly absorbs into and bonds with the outer layer of skin, providing a protective glove-like coating that comes off naturally with exfoliated skin cells after at least four hours. It is an ideal moisturiser for dry, extremely dry and

cracked skin, allowing skin to breathe and retain its natural moisture and oils.

Many workplace and household chemicals are absorbed directly into the skin, causing dryness, itching and cracks. **Gloves in a Bottle** creates a protective shielding layer while retaining the moisture from within.

The gloves are off

Unless it's the depths of winter, the only people that can get away with glove wearing are medics, food handlers, gardeners and Michael Jackson. But if clients long for hand protection to shield them from the impact of household chores and weather nasties, then introduce them to the new **Gloves in a Bottle**. Already going down a storm in the US, this non-greasy, hypoallergenic lotion only needs one application to protect skin from moisture, dirt and grime. Tel: 0800 389 4710
