

Gloves in a Bottle

Johnstone's & Leyland Paints has launched Gloves In A Bottle into all its 175 Decorator Centres in the UK and Eire. Applied to clean dry skin this non-greasy, non-sticky, hypoallergenic lotion rapidly absorbs into and bonds with the outer layer of skin, leaving no trace after just a couple of minutes. It forms a protective, moisturising and hydrating 'shield' that lasts for 3-4 hours and, unlike barrier creams or rubber gloves, it leaves hands safe to work with and easier to clean. Furthermore its ability in helping prevent chemicals (like those found in paints, thinners & cleaners), dirt

and grime from penetrating the skin cannot be washed away. You only have to apply 2-3 times a day, so with normal use a 60ml bottle at just £4.99 should last 3-4 weeks. For more information call Abbliss on 0800 389 4710 or visit www.giab.co.uk.

New Gloves in a Bottle is a non greasy, non-sticky, hypoallergenic and completely safe shielding lotion that safeguards eczema and dry, flaky skin. It offers 4-5 hours protection against harmful weather conditions and chemical irritants. Marketed in the UK by Abbliss Ltd, a family concern importing and distributing cosmetic products from around the world.

DEPARTMENT STORE YEARBOOK 2008

3 of the best... Barrier lotions

Use a barrier lotion
to protect your skin

Derma Shield

£5.98 for 50ml (01633 877569;
www.dermashield.info)

A moisturising mousse that gives a microscopic layer of shielding lotion which clings even to wet skin — it lasts for four hours.

Gloves In A Bottle

£4.99 for 60ml, from pharmacies
and garden centres (0870 745
5002; www.giab.co.uk)

Just like a pair of invisible gloves. It doesn't wash off, so can be used for gardening or household tasks. Lasts for four hours.

Savlon Barrier Cream

£2.49 for 60g, from chemists or
www.expresschemist.com

This is applied like hand cream, and is a good barrier for all sorts of jobs around the house and garden. Wash off with soap and water.

If you have any concerns about your health, visit your GP
